

## Configuration version for the Pick-up station „mobile“

## Advantages

- ✓ Various compartment sizes available
- ✓ Compartments secured with electronic locks
- ✓ Automatic notification by e-mail
- ✓ Open parcel box via QR code
- ✓ Online compartment reservation
- ✓ Reminder email
- ✓ Customer management cloud based
- ✓ 24 / 7 Parcel pick-up
- ✓ Receive parcels independently of the service provider

## Together for a better future

Mobile pick-up stations make it possible to make city centres more emission-free. Transport vehicles and routes are reduced and the type of delivery is also changed. Thanks to the use of hybrid or purely electric vehicles, your parcels are transported to the locations in an environmentally friendly way.

Time windows can be better calculated, enabling you as an end consumer or retailer to act more flexibly and receive or ship goods in a specific time period (e.g. 06:00 - 22:00). Help protecting the environment.

and retailers

↑ INTO THE CITY

## Pick-up station „mobil“

## Example locations strategically distributed in a city

## Retail pick up

Emission-free  
Transport

At the installation site, the trailer is no longer perceived as such:

- ✓ Ground level positioning of the trailer through pneumatic retraction of the wheels / axle
- ✓ Folding and stowing the drawbar

### Product info:

- Dimensions: ca. 5.060 x 2.560 x 2.500 mm (W x H x D) (with the drawbar folded in / retracted axle)
- Weight: 1,75t
- Item number: 74.0027.1

## Advantages:

- ✓ Delivery to a forwarding agent near the city
- ✓ Mobile station is filled from the inside
- ✓ Pulled to the installation sites emission-free by an electronic towing vehicle
- ✓ Positioning at central, easily accessible places
- ✓ Customers and retailers rent compartments
- ✓ Packages can be both sent and received
- ✓ QR codes / access pin will be sent via email (the QR code is an equipment variant - see description overleaf)
