

Function Description Software

- plan storage / handover and returns online (24/7 handover of goods)
- scan the QR-code thus generated at the pick-up station to open the reserved compartment
- automatic e-mail notification of compartment closure to the recipient
- determine max. storage period
- automated reminder or cancellation e-mail to customers / operators
- alternative input of the code on the 14" touch screen
- enables contactless handover

Further Advantages

- online management of:
 - locations, stations, modules and compartments
 - users, e-mail templates and translations
- current utilisation of the compartments in total or by station
- Rest-API for connection to merchandise management systems
- customised designs possible

Function Description Hardware

- individual equipment with compartment sizes from „XS“ to „XL“
- each cabinet half is divided into 12 height units (HU)
- can be freely designed with the available compartment sizes in such a way that the sum of the compartments results is 12 HU, e.g.:

$$\begin{array}{r}
 4 \times \text{„XS“-compartments} \quad (4 \times 1 \text{ HE}) \\
 + 2 \times \text{„S“-compartments} \quad (2 \times 2 \text{ HE}) \\
 + 1 \times \text{„M“-compartments} \quad (1 \times 4 \text{ HE}) \\
 \hline
 = 12 \text{ HE}
 \end{array}$$

Compartment Sizes

- compartment inside dimensions: 363 x 566 mm (W x D)
- compartment heights*
- up to 160 compartments possible
- electric locks

- subsequent extension possible
- maintenance shaft and technical module tamper-proof locks secured
- colour: RAL9016 traffic white
- customised foiling possible

Technical Module

- 1x is required for a pick-up station (6 HU)
- it is used in a cabinet on the left or right top
- 14" touch screen for easy operation
- QR-code scanner, optimised for fast and secure scanning from smartphone
